

HICONNECT™ 

STAY ONE STEP AHEAD
HIAB HICONNECT FOR LIFTGATES

LIFT YOUR DISTRIBUTION BUSINESS TO THE NEXT LEVEL

Today's logistics are extremely demanding. Every single delivery and every minute of optimal performance counts. Maximizing uptime means maximizing both your profit and your customers' satisfaction. But being able to control your equipment and plan the necessary maintenance requires full insight into every aspect of your tail lift's operation.

HiConnect is designed to enhance productivity, efficiency and safety of your business and the connected WALTCO equipment. Let us lift your business to the next level and make your daily life a little bit easier.

Hiab HiConnect™ for liftgates is a Connected Service that keeps you one step ahead with next-generation intelligence. By giving you access to real-time data about the condition of your equipment, it helps you to further increase efficiency, productivity and safety.

Monitor status, plan service, and improve operation from whole fleets down to single units. For less than truckload shipments you get detailed route information including driving time, stop locations/visits, cycles per stop and map tracking of visits.

The value you get from HiConnect for liftgates

Optimized performance

Understand where and how equipment has been used.

- Increase uptime
- Improve productivity
- Optimize usage and utilization

Improved safety

Stop unsafe behavior by getting insights to equipment usage logs and real-time notifications from your equipment.

- Improve safety conditions
- Reduce equipment misuse
- Increase equipment lifetime

Improved maintenance planning

See your equipment service history, upcoming services based on service plans and real-time service counters based on actual usage.

- Optimize service needs
- Reduce unnecessary downtime
- Increase equipment lifetime

Fleet managers: Stay on top of performance

Get an immediate overview of your liftgate's utilization. HiConnect offers easy integration with most Fleet Management Systems.

Service managers: Gain control over your fleet's service needs

Increase utilization and reduce downtime by understanding future service needs. View your equipment's service history, upcoming services according to service plans and real-time service counters based on actual usage.

Safety managers: Minimize accidents and unsafe equipment use

Get real-time information about incidents that may compromise the safety or functionality of your liftgates. View reports and get a clear picture of your equipment's condition.

HiConnect packages

HiConnect comes with two packages. The Standard package is free of charge during the first 12 months. For an additional cost, you can add the Safety package.

Standard package

- Cycles
- Operation time
- Battery voltage
- Charging time
- Auxiliary motor usage
- Service indicators
- Impact measurements
- GPS

Safety package (optional)

- Platform storage indicator alerts
- Overload alerts

Instant alerts are delivered via e-mail and text messages. A weekly report is issued by e-mail and includes active equipment overview, service overview, and a summary of notifications, alerts and utilization data.

CONTACT US TO FIND OUT HOW HICONNECT CAN MAKE YOUR OPERATIONS MORE EFFICIENT

HOW IT WORKS:

Sensors gather data on when and how drivers and equipment are operating. Data is sent to and stored in a cloud service.

Data can be easily accessed by your computer or mobile device with real-time updates.

Users can see the location and status of their equipment and what their operators are doing. Especially beneficial for trailers.

The data is displayed in an easy-to-understand format, helping understand how equipment and operators are performing.

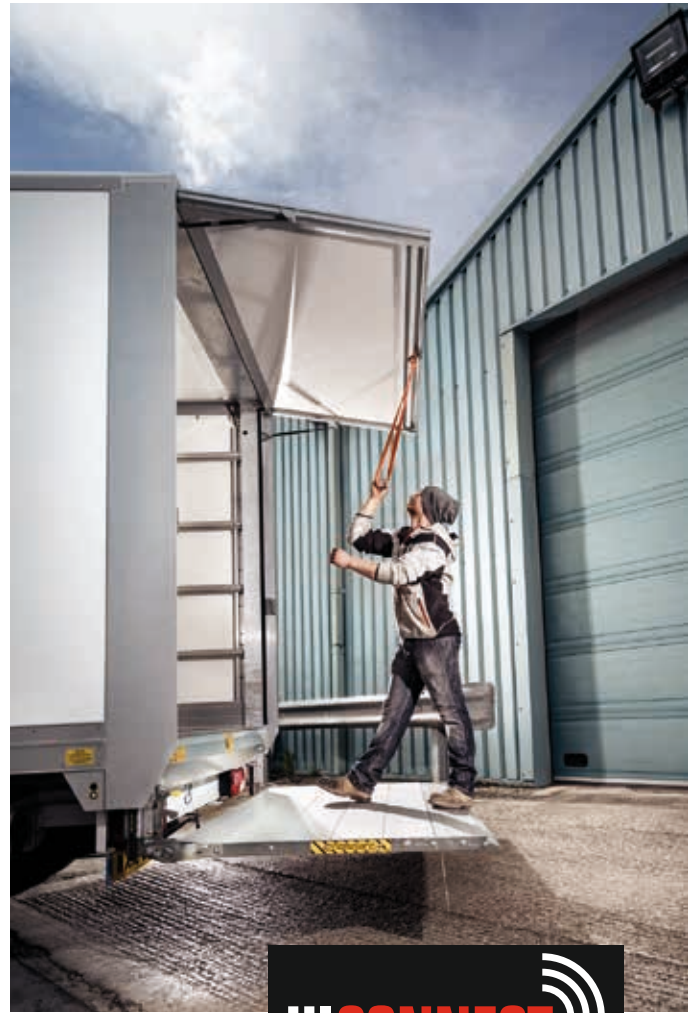

The data is then used to take action to improve safety, efficiency and productivity.

Fleet managers can see when equipment may need service and plan accordingly to minimize downtime.

HiConnect™ helps determine equipment utilization so resources are deployed more efficiently while minimizing costs.
